

ONE PLATFORM, EVERY LOCAL BUSINESS

Your Business. Your Brand. Your Own Ordering App.

A complete ordering and management platform for any local business — restaurant, grocery, bakery, meat shop, and more — a customer app and a manager dashboard, fully working today, built under your name, your logo, and your colours.

Customer Mobile App

Manager Dashboard

Any Local Business

Live working examples shown in this document: **Aryan Restaurant** and **Aryan Grocery** — two different businesses, running on the same platform today. Every screen pictured here is a real, running product, not a design mockup.

Stop renting your customers

Every order placed through a marketplace app is a customer that belongs to the marketplace, not to you — and a slice of every bill goes with it. **A platform built under your own name changes that:** the app, the data, and the relationship with the person ordering are yours.

01

Fully Your Brand

Your restaurant's name, logo, and colours appear everywhere — the app icon on a customer's phone, the splash screen, every button. Change it once, and it updates across the entire app instantly.

02

Everything Talks in Real Time

A customer places an order and it appears on your dashboard instantly, with an audible alert. Update the status, and the customer sees it update live on their phone — no refreshing, no delay.

03

Delivery and Dine-In, Together

Take online delivery orders and walk-in dine-in bills from the same dashboard, with revenue reported separately for each — something marketplace apps were never built to do.

04

Built to Run Your Way

Turn off online ordering with one tap during a rush. Set which pincodes you deliver to. Run your own promo codes. Every operational decision stays in your hands.

0%

No per-order commission. Marketplace apps typically charge 20–30% of every order. This platform is yours to run — what a customer pays is what you keep, minus your own payment processing.

One Platform, Any Local Business

The same system underneath — branded app, live orders, a manager dashboard — already runs two different kinds of business side by side. Every other category below uses the exact same platform, ready to onboard today with no new development.

Restaurant

Full menu, dine-in & delivery, table billing.

LIVE — ARYAN
RESTAURANT

Grocery

Weight-based pricing, per-item stock counts.

LIVE — ARYAN
GROCERY

Bakery

Fresh bakes, pack pricing, daily specials.

READY TO
ONBOARD

Sweet Shop

Boxed sweets, festival specials, weight pricing.

READY TO
ONBOARD

Meat Shop

Cuts priced by weight, freshness-first stock.

READY TO
ONBOARD

OTC & Wellness

Vitamins, personal care, wellness — no prescriptions.

READY TO
ONBOARD

Flower Shop

Bouquets, occasion-based orders, per-item pricing.

READY TO
ONBOARD

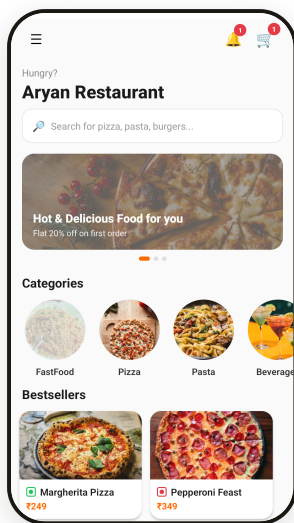

Your Business

Any local shop that takes orders and delivers.

LET'S TALK

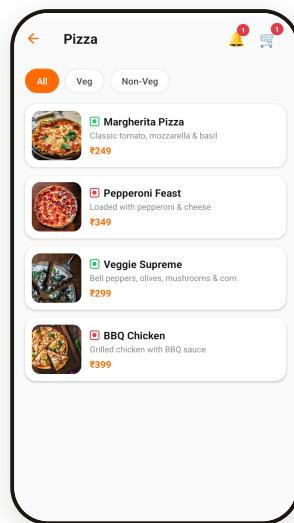

From Browsing to Checkout

These are real, live screens from Aryan Restaurant's app — not mockups. The same screens, restyled with your name, your logo, and your menu, already power a completely different business today: Aryan Grocery.

The Ordering App

A polished, familiar ordering experience your customers already know how to use — built specifically for your menu, your delivery area, and your offers.

Browsing & Ordering

- **Categories & catalog** with photos, organized exactly the way your business already works
- **Search** that finds items instantly as customers type
- **Veg / non-veg** filters and clear indicators on every item
- **Auto-sliding offer banners** above the menu — feature what you want customers to see first
- **Cart** that stays open while customers keep adding items — no interruptions
- **Promo codes** with real, calculated discounts at checkout

Account & Access

- **Registration & login**, with a quick demo login for evaluation
- **Remember me** — customers stay signed in between visits
- **Forgot password**, handled by email, start to finish
- **Profile** customers can view and update themselves
- **Multiple delivery addresses**, saved for next time
- **Delivery-area check** — customers outside your service area are told upfront

Orders & Tracking

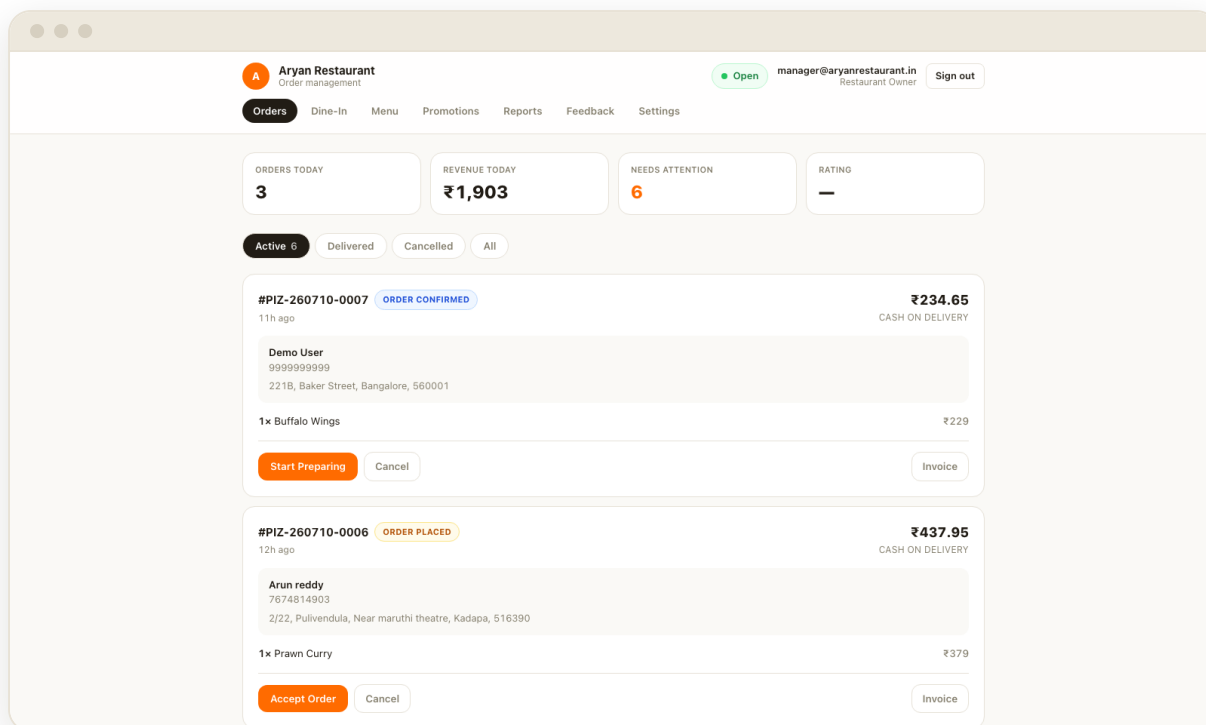

- **Live order tracking** with a visual status stepper, updating in real time
- **Order history**, with every past order at a glance
- **Spending summary** — daily, weekly, monthly, and yearly totals
- **Order cancellation** with a reason, while it's still early enough to cancel
- **In-app notifications** for every status change — accepted, preparing, out for delivery

Trust & Support

- **Feedback & ratings**, sent straight to you
- **Contact Us** with your business's phone, email, and address
- **Privacy Policy & Terms**, included and ready
- **"Currently closed"** notice shown automatically when you're not accepting orders
- **A proper splash screen** — your logo and name, first thing a customer sees

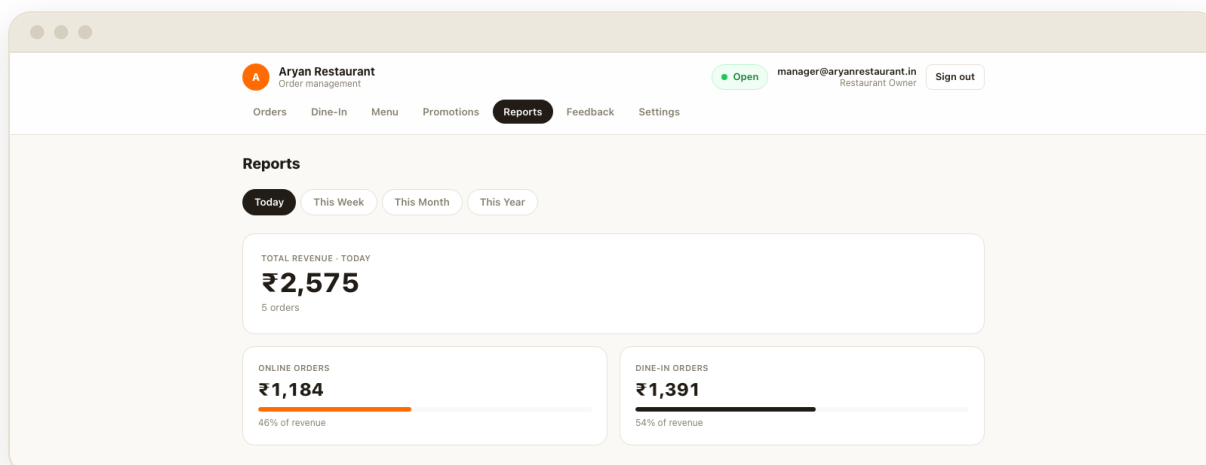

Run the Business, Live

The same dashboard shown here is what your team would use — orders arriving in real time, and revenue reported the way a real restaurant needs it: online and dine-in, kept separate.

Live Order Queue

Every order, in real time, with one tap to accept, prepare, or dispatch

Revenue Reports

Online and dine-in revenue, reported separately, for any period

The Manager Dashboard

Everything needed to run the business day to day, from a browser on any computer — no installation, no extra hardware required.

Live Order Management

- **Live order queue** with an audible alert the moment a new order comes in
- **One-tap status updates** — accept, prepare, ready, out for delivery, delivered
- **Cancellation with reason**, recorded and shown to the customer
- **Printable invoices** for every order, one click away
- **Accepting-orders switch** — pause online orders instantly during a rush or closing time

Menu Control

- **Categories & items** — add, edit, or remove anytime, no developer needed
- **Photo upload** straight from your computer for every dish
- **Pricing, veg/non-veg tags, and bestseller flags**, all editable
- **Availability toggle** — mark an item out of stock in one tap

Dine-In Billing

- **Walk-in order entry** — build a bill from your live menu in seconds
- **Table number tracking** on every dine-in order
- **Printed receipts**, ready to hand to the customer at the table
- **Kept separate from online orders** in every report

Offers & Growth

- **Promotional banners** shown directly in the customer app
- **Real promo codes** — percentage or flat discounts, with a minimum order value and expiry date
- **Customer feedback**, collected and readable in one place

Revenue Reports

- **Daily, weekly, monthly, and yearly** revenue at a glance
- **Online vs. dine-in** revenue reported separately
- **Order counts** alongside every figure, for context

Delivery & Access

- **Deliverable pincodes** — set exactly where you deliver, editable anytime
- **Staff login** with forgot-password and remember-me built in
- **Role-based access** for owners and managers

What It Costs

One flat setup fee, then a flat monthly plan — never a percentage of what you earn. Both are priced under what a marketplace app's commission already costs you today.

₹5,999

One-time setup — branded app build (icon, name, colours), admin login, guided catalog setup for your first ~30 items, and one training call to get your team started.

MONTHLY

Starter

₹599/month

- Unlimited orders
- 1 staff login
- Shared admin address
- Support by WhatsApp, within a day

MONTHLY

Growth

₹1,499/month

- Everything in Starter
- Up to 5 staff logins
- Your own admin address & login branding
- Priority same-day support

Annual billing

2 months free on either plan

Your own Google Play Store listing (your account, your ownership)

+ ₹2,999 one-time

Add your own items anytime — no limit, always free

₹0

Prefer we enter items for you, beyond the first ~30

₹10 / item

In-app card / UPI payment gateway

Roadmap — once you have GST/firm registration

READY WHEN YOU ARE

This isn't a pitch for something I still have to build.

It's already built, already running, and already handling real orders end to end — for the customer placing an order and for you managing it. Whether you run a restaurant, a grocery store, a bakery, or any other local business — give me your name, logo, and catalog, and I'll bring the same platform to life for you.

Working Today

Not a prototype — a live product you can try right now.

Fully Yours

Your brand throughout, your data, your customer relationships.

No Commission

Keep what your customers pay — no per-order marketplace cut.
